

**SMA Magnetics Sp. z o.o.** – leading manufacturer of magnetic components, starting from measuring elements such as current transformers up to solutions like transformers and inductors part of complex induction blocks. Belongs to SMA group, a leading global specialist in photovoltaic system technology with more than 3,000 SMA employees in 20 countries with sales close to one billion EUR.

Currently we are looking for:

## **IT Solution Architect Cloud Platform**

Location: Zabierzów, nearby Kraków

### **Your role:**

- Innovation and technology consulting to various organizations within SMA to create additional value.
- Market evaluation for both new and mature infrastructure technologies, solutions and market trends
- Feasibility studies and prototyping to evaluate and verify the maturity level and efficiency gain of vendors and solution
- Taking over the project management in an agile team to transform existing IT infrastructure services and operations using new technologies.
- Acting across infrastructure domains and organizations to ensure company-wide benefit and synergies
- Gathering of requirements for infrastructure, conducting a TCO analysis and supporting redesign and standardization activities.
- Designing and developing cloud-based solutions
- Gathering established environments and overarching functional requirements and transforming them into modern cloud native architectures and solutions
- Development and implementation of scalable, automated solutions using current technologies

### **What we require:**

- Certificated Cloud Architect for Azure or AWS
- Good knowledge of the Microsoft Azure or AWS ecosystem and an understanding of the limitations, pitfalls and benefits of the offered products
- Hands on experience with container orchestration, Kubernetes and Terraform in Azure or AWS environments
- Experience with cloud solutions and the full development life-cycle ranging from creating functional and technical specifications, documentation, QA processes, continuous integration up to deployment.
- Experience in understanding established environments and overarching functional requirements and transforming them into modern cloud native architectures and solutions.
- Reference in the development and implementation of scalable, automated solutions using current technologies is an advantage.
- Scripting skills including Bash, PowerShell, Python, etc. are an advantage.
- Strong ability to work in a team and motivation to break new ground in projects, to try things out and to be creative instead of just providing and operating the infrastructure used by others
- Must have a well developed sense of good customer service and have very good communication skills, both verbal and written.
- Behavior aligned to an Agile Mindset – Values & Principles

**As part of our Team we offer you:**

- Stable employment under a full-time employment contract,
- Employment in an international company with an established market position,
- Social package: medical care for an employee with the possibility of extending the package to family members, group insurance, Multisport sports card,
- Financial bonuses for holidays and Christmas,
- Internal and external trainings,
- Positive work atmosphere,
- Flexible working hours,
- Being part of Eco friendly, renewable energy propagators Family.
